

Our philosophy

“Culture make a human being and human activity”

The current world can't find an answer to the social distortion caused by Covid.

A fear of Covid, recession in the world, Divided society.

In this time, we don't need a culture anymore? We think “No”

Indeed, we have a phenomenon social problem caused by political mismanagement, and these social problems start from the country side as Akita, on our generation.

What was the cause of the mismanagement of the politic? We think that the politic has no culture.

“Man shall not live by bread alone” , however, didn't the world want only a bread for long time? didn't the world consider a culture as just an entertainment?

“In the beginning, there was a word” . Yes, we need a word above all. The word is a culture which can make us search ourselves. Of course, we can not find it as Socrates said, but we can search, and it's an importance of the culture. Namely, have your own word.

“When the man become the main character of his life, the world will become a truth” as the Zen teach us.

We think that when the man has a culture in himself, he become not as a slave of AI but a citizen who can participate in the social activity voluntarily and intentionally, This is an energy of human being and social's that has a possibility to make a sustainable and diverse society.

We believe that just a little poem changes a life, an art makes a human being and a culture makes a world. Under these belief, we have an intention to found an international music festival in Akita where we love.
